

Supplemental Annual Assessment Report Matrix

Department/Activity: Upper Level Courses – CHEM 305&306

Date: 5/30/03

Program (if applicable):

Mission:

This matrix is to be completed only when an action to address an Assessment Result will require additional resources. This form will provide documentation in the budget process.

Expected Results	Assessment Tools	Assessment Results	Action(s) Taken	Resources Required
The students must meet standards obtained from the ACS for the ACS exams and standards set by the professor on the course final. Specifically, the students must be able to use models and mathematical formulas; and, be able recognize trends from plotted data. This information is obtained from the final examination.	A plan that defines the goals/skills to be acquired, data collection methods, sets the standards, and evaluates the data, and makes recommendations was utilized. The plan ties questions on two different ACS standardized exams and the final exam to the skills designated for the course.	Data collected during the three year time period indicate the standards have been met.	No remedial actions were deemed necessary.	Provide funding that will allow for planned upgrades of facilities.
