

1. Name

Terry L. Thompson, EIT

2. Education

B.S., Civil Engineering, The Citadel, Charleston, SC, 1989

3. Academic and Professional Experience

*Academic Experience*

The Citadel, Adjunct Professor, The Citadel, Charleston, SC, 2024-Present

*Professional Experience*

Bore-Tek, President/Owner, 2000-Present

CPI Construction, Project Superintendent, 1992-1999

Fluor Corporation, Design Engineer, 1989-1992

*Career Summary*

Over three decades of technical experience in planning, engineering, implementing and supervising wide range of complex design-build engineering and construction projects. Recognized technical expert in horizontal directional drilling, trenchless technologies, and extensive bentonite pumping systems. Engineering consulting services provided to utility companies and engineering profession to identify optimal solutions for challenging and complex applications involving a wide variety of underground utilities including telecommunication, water/wastewater and power distribution.

4. Professional Credentials, Certifications, and Licensing

*Credentials*

Engineer in Training, South Carolina

5. Professional Development in the Past Five Years

Attended Horizontal Directional Drilling Academy three sperate times.

Complete Advance Horizontal Directional Drilling Calculations courses.

Attendance of "Mud School" by CETCO, now Mineral Technologies, in Montana and toured the bentonite mines.

6. Contributions to the Discipline

*Service Activities*

Lead technical seminars across NC, SC, and GA, providing procedural support and training for engineers, installation crews, and equipment technicians on engineering parameters and pumping solutions for horizontal drilling operations.

Provided expert engineering services and technical training for horizontal drilling and pumping for a wide array of clients: Dominion Energy, SCE&G, BP Barber, HDR, Nucor, Tar Hell Construction, Lee Electrical, and Pinnacle Construction.
