GUIDANCE:

Section 4; Detail the specifics about the emergency situation and how there is an immediate threat to life, safety, or property. Explain how the situation will be remedied and what is required both in terms of materials and services to ensure normal operations are maintained or restored. This section should also address the negative impacts that will be felt at The Citadel if immediate action is not taken.

Section 5; Cite the specific, factual reasons why alternative suppliers could not remedy the emergency in time to be considered. Explain how the use of this particular supplier was the most efficient means of mitigating potential damage at The Citadel.

The Drug-free Work Place certification must be obtained for emergency procurements greater than \$50,000.

EMERGENCY PURCHASE JUSTIFICATION

Emergencies are defined as situations which endanger health, life, property, or continuation of vital campus operations or programs, and that can only be rectified through immediate action. FAILURE TO PROPERLY PLAN FOR A KNOWN FUTURE PURCHASE DOES NOT CONSTITUTE AN EMERGENCY SITUATION.

- 1.) Contract Amount:\$
- 2.) Requested Supplier:
- 3.) Deadline Date for resolution of the situation:

4.) Describe the Emergency situation, the resolution required, and the negative consequences that would result if immediate action is not taken:

Coward Hall freezers/refrigerators are fundamental components of a safe commercial kitchen. Auxiliary Services has a project to replace the condenser and evaporators at Coward Hall commencing on 5/8/2023. The current state of the refrigerators/freezers is precarious and needs to be shored up. Coward Hall has experienced significant and frequent equipment failures that lead to loss of product and/or substantive efforts to salvage cold-stored products by moving them to other freezers/refrigerators that are working at the time.

5.) Explanation as to why no other supplier can provide the immediate remedy that is required to resolve this situation:

Cullum Services won the bid for the project to renovate the space in May 2023. Cullum also was one of the service providers who performed a lot of the work when maintenance calls were submitted throughout the lifespan of the current condensers/evaporators, so Cullum has the background information about the current system and what needs to be done that will get the freezers/refrigerators back to working condition cheaply and effectively.
